

GOOD NEWS about Our HARBORWALK Mural

We just got the news that FDOT (Florida Department of Transportation) has approved our application for the mural! It's been a long process (over a year) but it's finally done. A big THANK YOU to Weiler Engineering for donating their time to work this application on our and the City's behalf!

The City anticipated the approval and started the site prep work last week. If you visited the Harborwalk recently, you might have seen workers at the Mural site. They are contractors for the City and are busy prepping the area and the wall for our mural. The rusted rebar in the ceiling (overpass floor) was treated and will be repainted. The back-mural wall was cleaned, re-grouted and sealed and all the mural surfaces will be primed.

We'll give the primer time to cure and the artist will start painting after the holidays.

Many THANKS to the City of Punta Gorda for this prep work and giving us a clean canvas for the mural!
