Mr. Svedberg explained that there are three levels of identification for the differential of the building levels, and would be similar to the way the building is identified currently.

Member Goodman clarified that the building differentials are all a part of mobility, to which Mr. Svedberg agreed and explained that each event would have a transportation plan for their specific event that would further refine the event-specific signage and identification of how to move people in.

Mr. Hill commented on the functional standpoint of the new facility and stated that there will be floor utility boxes in the new hall and discussed that staff is considering putting floor utility boxes in the existing facility. Mr. Hill also addressed Member Goodman’s inquiry on ancillary lobbies.

Mr. Jicinsky clarified that the names of the halls are currently working titles, and that there will be a formal naming exercise further along in the Phase Three Renovation as the wayfinding and finishing touches are completed.

Mr. Miller answered that in the event there would need to be a change in the design, Mr. Hill would give authorization, and stated that TVSDesign understands the design and design intent, and explained the process that would occur in the event of a change in the design.
