Culture in Fjord Norway

(Fjord Norway)

Description

Fjord Norway, on the west coast of Norway, is a region full of contrasts. Known for its stunning fjord landscape, with glaciers, roaring waterfalls and charming fjord cities, most people know it as a summer destination. The region offers a great diversity in cultural experiences, history and heritage and exciting local food and drink. The Viking heritage, great collections of art – from Norwegian painters like Munch and Astrup, exciting architecture along the National scenic routes and 2 Philharmonic orchestras have their home in the region – and quite a few well known artists like Kygo, Sigrid and Aurora come from the region. Local food like the best seafood in the world, lamb, cheese and fruit and berries are among our specialties. Visit the Fjord Norway region in the wintertime and the experience will be very different: You will get close to nature, experience the season and the weather travelling in the fjords in an unfamiliar season gives different, but exciting experiences.
