Comments:	All of a sudden, Australian Ave on Palm Beach has low flying, loud commercial airliners flying directly overhead. Will this continue or will things return to normal when Trump is not here? Thank you.

Mr. MacKenzie,
Thank you for your comments.

The security measures issued for the President Elect/President while visiting or in residence in an area is coordinated by the Federal government. It is our expectation that normal operations will resume after his visit.

If the flights over your area continue, please contact me.

Thank you
